

French Study

Determines Antioxidants Applied to Skin
Reduce Long-Term Skin Damage

Paul Harvey once referred to this French Study (1998) on the radio. Estee Lauder Companies was the only cosmetic company selected to participate in the SU.VI.MAX. study. The most profound results, obtained after 18 months of treatment, clearly show a marked improvement in the condition of the skin treated with a preparation containing the antioxidant blend of (e.g., vitamins C, E and beta carotene a vitamin A oil,)

Compared to that which was treated with the placebo: a 23% reduction in the appearance of new lines and wrinkles and an 8% reduction in the appearance of existing lines and wrinkles.

Grape Seed Oil is rich in all three of these antioxidant vitamins used in this study.

Our bottles are a convenient size, perfect for dispensing your Rose Hip Oil accurately; one drop at a time, allowing your oil to last up to twice as long. Our roll-on is great addition to your purse, pocketbook, pocket or gym bag.

The information contained in our brochure and/or website are for educational purposes only and not to be used as medical advice or as a recommendation for treatment of disease. For diagnosis and treatment, consult your physician.

Shake well before using.

For most applications apply a few drops of Grape Seed Oil onto your fingertips and massage gently onto your skin using a circular motion until completely absorbed. Repeat as necessary. Grape Seed Oil has healing properties and does not cover the skin with a petroleum type air barrier. It allows the skin to breathe & heal.

For facial applications apply 2 or 3 drops of Grape Seed Oil onto your fingertips. Gently massage using a circular motion until completely absorbed. Apply as desired. The thinnest skin on the body is found around the eyes. It can be thinner than a millimeter! This means that a light touch and proper care are necessary for this delicate area to look and feel beautiful. Pat with your ring finger near the eye exerting the least amount of pressure rather than pulling skin.

Storage:

How Long Does It Keep? Grape Seed Oil normally lasts for 18 to 24 months at room temperature, twice as long when refrigerated. Keep at near 75 degrees at home or in the office, out of direct sunlight. When traveling keep Grape Seed Oil in a pocket, gym bag, purse but do not leave Grape Seed Oil in the car or anywhere hot. Keep what you do not use on daily basis refrigerated. Shake well before using.

Expeller Pressed Grape Seed Oil

Nutricare Plus carries an advanced skin care line of premium quality antioxidant oils designed to heal problem skin conditions by using only the finest certified organic and natural ingredients.

The Nutricare Plus line of Grape Seed Oil is cold pressed which is expeller pressed in a heat-controlled environment to keep temperatures below 120 degrees F. Our Grape Seed Oil is not refined, bleached or deodorized (RBD) and in this pure virgin form retains the high amount of vitamin E, vitamin C, beta carotene and other antioxidants; which protect cells from unstable oxygen molecules that can ravage the body. Grape Seed Oil is used as an emollient and is excellent for mature, damaged and stressed skin especially around the eyes.

Grape Seed Oil is high in linoleic acid (Omega-3), an essential fatty acid that the body can't produce. Nutricare Plus Grape Seed Oil as a vitamin E antioxidant oil has tremendous antioxidantizing properties that protect elastin and collagen fibers against the ageing process and is regenerative and helps control skin moisture.

Nutricare Plus Grape Seed Oil is derived from crushing and excelled pressing grape seeds. The oil is then filtered. The nutrition and the flavor remain with this process even though less oil is obtained than with solvent (chemical) extraction.

The dark green color is due to even the chlorophyll remaining in the oil. It is 72%+ polyunsaturated and 14+% monounsaturated and rich in antioxidants.

Why Our Grape Seed Oil?

- Powerful antioxidants fight free radicals.
- 50 times stronger than vitamin E
- 20 Times more potent than vitamin C
- Anti-bacterial, anti-viral & anti-inflammatory
- High in linoleic acid (Omega-3), an essential fatty acid that the body can't produce.

The Nutricare Plus line of Expeller Pressed Grape Seed Oil is derived from crushing and excelled pressing grape seeds. (not solvent extracted using chemicals) Grape Seed oil as a vitamin E antioxidant oil is believed to be regenerative and helps control skin moisture.

It is used as an emollient and is excellent for mature, damaged and stressed skin especially around the eyes. It is a great moisturizer for the skin.

Grape Seed Oil is unique due to its high concentration of polyunsaturated acids and natural antioxidants that control the presence of free radicals in the body.

Extra Virgin Expeller Pressed Grape Seed Oil has been recognized as a healthy oil for its natural Omega-3 and powerful antioxidants is widely used by millions of women in the beauty industry.

Our Extra Virgin Expeller Pressed Grape Seed Oil can be ordered as a Natural Oil or scented with "True European Lavender"

This essential oil that is derived from the whole lavender plant allowing the captured and retention of its natural energy and ingredients in its purest form.

Lavender is considered one of the most gentle and versatile essential oils. It strengthens the immune system and speeds the healing process.

Lavender regenerates skin cells; it can be applied directly to the skin at full strength and is excellent for burns and wounds (prevents scarring) and skin problems.

Expeller Pressed Grape Seed Oil "Hot Oil Treatment"

Grape Seed Oil is the ultimate natural hair cleanser and conditioner. This warm oil treatment will relieve brittleness, breakage and split ends. * Warm .5 oz to 1 oz bottles of Grape Seed Oil in warm tap water just until the oil is lukewarm (test on wrist).

Apply the oil to fingertips and massage well into hair, especially the ends. Leave in hair for 15 to 20 minutes; then shampoo twice, and rinse your hair out.

* Do not use hot grape seed oil and do not use a microwave or a stove to warm oil.
